

# Overview

The Mobile Application Development Club at Embry-Riddle Aeronautical University has a number of technology hardware available to be checked out by students. Only current Embry-Riddle Aeronautical University students that are active members of the Mobile Application Development Club may check out and borrow Mobile Application Development Club resources.

The organization intends for these devices to be used for the following benefits:

- For developing and testing mobile applications on physical devices with high-end features and specifications
- To provide access to technology that is otherwise unavailable to the individual for teaching and skill development
- To aid members of the M.A.D. Club in their pursuit of knowledge about modern technologies in both an academic and non-academic setting

## Policy

By checking out any resource from the Mobile Application Development Club, you agree to the following:

- The Mobile Application Development Club will not be held responsible for any misuse of the device, including but not limited to criminal activities as well as violations of the [ERAU Acceptable Use of University Computing Resources Policy](#).
- If a device is lost or stolen, you will be obligated to pay the associated cost for purchasing a new device. Lost accessories will be billed according to replacement cost.
- If the device is damaged beyond use, you will be obligated to pay the cost associated with repair or replacement of the device.

The penalty for a late device will be suspension of resource checkout privileges for a minimum of 10 days. Repeat offenders will face further suspension of those privileges.
